Farm Supervisor

Responsibilities

- Crop Management Activities: Plan, coordinate, and supervise crop planting, cultivation, irrigation, fertilization, and harvesting activities.
- Team Supervision: Lead and manage farm workers, ensuring tasks are completed efficiently and safely.
- Equipment Oversight: Operate and maintain farming equipment to ensure optimal performance.
- Quality Control: Monitor crop health and address pest, weed, and disease management issues.
- Record-Keeping: Maintain accurate records of farm activities, including yields, expenses, and resource usage.
- Compliance: Ensure adherence to agricultural safety standards, environmental regulations, and company policies. Report all farm activities to line manager promptly

Qualifications

- Degree / Diploma in Agriculture, Horticulture, or a related field (preferred but not mandatory).
- Proven experience as a farm supervisor or similar role in crop production.
- Strong knowledge of agricultural techniques and farm equipment.
- Excellent leadership and team management skills. Ability to work in outdoor environments and handle physically demanding tasks.
- Strong problem-solving and organizational skills.
- Familiarity with crop-specific requirements [e.g., Cassava, Maize, Plantain, etc.].
